REGENERATIVE FARMING & AGROECOLOGY

Level 2 | Starting September | For a resilient future

1 academic year, full-time course in Agroecology with land-based learning to help people transition into, or upgrade their skills in, the world of regenerative and agroecological farming. Study in real-life training settings within the Black Mountains on the border of Wales and England.

- The world of farming and food production is changing due to climate change and fluctuating economic environments, pushing farmers to diversify for resilience. Agroecology explores the use of natural systems to promote good food for everyone, forever.
- Further your experience in agroecology, agroforestry, soil science, and social and economic elements of regenerative approaches to land management and agriculture.

Why study Agroecology at BMC?

“The BMC experience is brilliant. I am truly happy here, I would fully recommend it to friends and regularly do.” - 2023 BMC Student

- Undertake authentic work experience on a working farm, market garden or managed woodland to enhance your employability skills and embed your learning.
- Prepare for work in regenerative farming, small holding settings, community supported agriculture, circular food economy, or in regenerative land based systems.
- Progress into higher education courses such as our BA (Hons) in Sustainable Futures: Arts, Ecology and Systems Change.
- These skills are in high demand.
- Free to study for UK residents aged 16+.

Please Note: All courses are subject to approval and change.
